

NATIONAL

RECORD-BREAKING TWO IN FIVE NEW HOME LOANS FOR INVESTORS – LATEST FIGURES

1 April 2014

Two in five new home loans last month were processed for investors according to AFG, Australia's largest mortgage broker. AFG's Mortgage Index shows that 39.6% of all mortgages processed in March were for investors – the highest such figure the company has recorded in the seven years it has been reporting mortgage data.

A total of 3,384 loans with a total value of \$1.6 billion was processed for investors during March by AFG. The company has 11% of the total mortgage market in Australia (Source: AFG and ABS statistics) and while its figures are not definitive, they are strongly indicative of data published by the ABS six weeks later.

Investment activity varied from state to state. In NSW, investors accounted for 49% of all new home loans, in both Queensland and Victoria 37%, and in both South Australia and Western Australia 32%.

Mark Hewitt, General Manager of Sales and Operations says: 'Investors have been driving the market for most of the past twelve months to the point that two in five of all new home loans in March were for investors. The vast majority of these are Mum and Dad investors taking advantage of the equity in their existing properties, and the low rate environment, to build their property portfolio. The fact that fixed rate loans are now less popular than they have been for most of the past year suggests that borrowers are also less concerned about the prospect of potential rate rises.'

Fixed rate loans comprised 23.9% of all mortgages processed in March, down from 25% in February and a peak of 30.7% in April 2013.

Loan to value ratios, the value of a home loan expressed as a proportion of the property value, remained steady at 68% nationally – the level is has held for much of the past year.

Total loans processed by AFG in March were \$4,048 billion– the company's second biggest month since last October, when it processed \$4,057 billion.

DEFINITIONS

1. **Standard Variable:** includes the full range of features available.
2. **Basic Variable:** without some features, lower fees and rates.
3. **Intro:** also known as 'honeymoon' where the borrower is offered a very cheap initial rate (fixed or variable) before the loan reverts to a Standard Variable.
4. **Fixed:** interest rate is fixed for a nominated period before it reverts to a Standard Variable.
5. **Equity:** also known as 'line of credit' allows the borrower to draw out money up to a specified limit. Generally more expensive than Standard Variable loans.

NOTE TO EDITORS

AFG is Australia's largest mortgage broker. Established in 1994, the company now provides more than 20% of brokers nationwide with access to Australia's leading lending institutions, and has a mortgage book in excess of \$89 billion.
